WE shall insert in this Place a *SCHEME* of the Proportions the several Counties paid to the *Land-Tax*, in 1693, and to the *Subsidies* in 1697, compared with the Number of Members they send to Parliament, as calculated by *Mr. Smart* of *London*.

In this *SCHEME* the Proportions are thus considered, *viz.* That as the whole Kingdom sends 513 Members to Parliament, so the whole of each Tax is divided into five hundred and thirteen equal Parts: And the first Column shews the Name of the County; the second shews how many of the 513 Parts each County paid to the *Land-Tax* in 1693; the third, how many of the 513 Parts each County paid to the *Subsidies* in 1697; and the fourth, how many of the 513 Members each County sends to Parliament.
